

We are **cronn** - a Bonn-based software development company with branches in Hamburg and Białystok. Software development is our passion. We trust in Java, OpenSource and, last but not least, in our experienced team. All of this we deploy to bring our clients software that is key to their business, or to professionally consult them in issues regarding architecture, tools or approaches.

## Internship

Location: Białystok

### **What can you expect?**

- Participate in a real hiring process with a technical interview – just as every other employee – before starting your internship
- Solving real problems instead of repeating boring clichéd tutorials
- Frontend development with Angular/React, backend development with Java or full-stack development, if you can perform in both these worlds
- Work together with experienced software developers, the way we do it every day - using TDD, Pair Programming and Code Reviews
- Collaborate in agile teams, participate in meetings
- Experience the every-day life of a software developer

### **What are we expecting from you?**

- Solid basis and passion in programming
- Basic knowledge of a language of your choice: Java, Javascript or Typescript
- Openness to learning new tools, like Docker, Gradle, Sonarqube, Git
- Communicative English in speaking as well as in writing
- Thinking and asking questions before doing
- Enthusiasm for learning and self-development
- Participation in team activities and everyday company life
- Polite manners, a sense of humor, a smile and a positive attitude
